CareerLink

3 roles (Admin, Employers, Students)

career-link is a web portal for the college where the employer can hire college alumni and students can apply to their job postings. in middle of this all , there will be a admin who's role is to create a account for the employer and then give that credentials to the employers from which they can login to the portal.

Admin

- admin will login to the portal first

- admin will then create employer's account where he will provide a email and a password from which the employer's will be able to login.

- admin will further manage the employers and there job postings.

Employers

- employers will login with the credentials provided to them by admin.

- employers can post a job posting for the students to apply to.

- employers can search the student through custom filters.

- they can see the CV and details of the Students.

- they can select the students.

Students

- students can login with OAuth via Microsoft

- students can complete there profile and upload there CV's.

- student can search and apply to the Jobs.

- manage there applied jobs.
- search for employers via entering field of work.
